

# RADAR FOR THE ELITE

## M600C Datasheet

Compact Surveillance Radar

# SpotterRF M600C

Setup time	3 minutes with web UI
Coverage Area	1000 m x 800 m = 150 acres
Max range	Walker: 1 km, Vehicle: 1.5 km
Range Resolution	3 m
Angular Accuracy	+ - 3 degrees
360 degree coverage	4 radars
Training time required	30 - 60 minutes in field
System Power	10 W @ 12-30 VDC w/ PoE injector
Interface	Ethernet (Cursor on Target, Google Earth)
Transmit frequency	X Band, FCC licenced
Update Rate	Once per second
Simultaneous tracks	20
Temperature Range	-30° C to 65° C

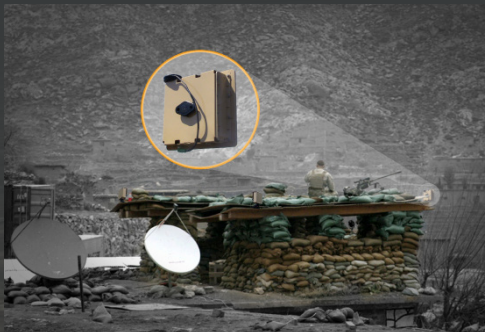

Height 22.23cm

1.8  
Kg

Depth 5.72cm  
Width 25.72cm

## Compact Surveillance Radar

### Firebase

Place radars around your firebase to alert you of possible threats in all weather conditions.

### Vehicle mount

Protect your parked convoy with a no-maintenance, no-moving-parts, wide area surveillance radar.

### Perimeter security

Secure your high value facility with wide area surveillance day or night.
